IMPORTANT NOTICE

This Prospectus contains information about FCMB Group Plc (the "Issuer" or "FCMB Group") in connection with the Offer for the purpose of giving information to prospective investors in respect of the Offer described therein. The Prospectus and the securities offered have been cleared and registered with the Securities and Exchange Commission (the "SEC" or the "Commission"). An application was also made to the Nigerian Exchange Limited ("NGX") for the admission of the shares being offered by way of this Prospectus. The Ordinary Shares of the Issuer being offered will rank pari-passu in all respects with all other existing ordinary shares issued by the Issuer, including the right to receive dividends or other distributions declared, made or paid on the shares after allotment by the Issuer. No person has been authorised to give any information or make any representations other than those contained in this Prospectus and if given or made, such information or representations must not be relied on as having been authorized by the Issuer and / or the Issuing Houses. The Issuer accepts responsibility for the information contained in this Prospectus. To the best of the knowledge and belief of the Issuer (which has taken all reasonable care to ensure that such is the case) the information contained in this Prospectus is in accordance with the Investments and Securities Act, No. 29 of 2007 ("ISA") and the Securities and Exchange Commission Rules and Regulations 2013 (as amended from time to time) (the "SEC Rules") and contains no omission to affect its import. The Issuing Houses, which are registered with the SEC in Nigeria, are acting exclusively for the Issuer in connection with the Offer. Additional information may be obtained through the Issuing Houses on any Business Day during the Offer period, provided the Issuing Houses possess such information or can acquire it without unreasonable effort or expense, as necessary.

Third-Party Information

The Issuer has obtained certain statistical and market information that is presented in this Prospectus from certain government and other third-party sources described herein. The Issuer has accurately reproduced such information and, so far as the Issuer is aware and is able to ascertain from information published by such third parties, no facts have been omitted that would render the reproduced information inaccurate or misleading. Nevertheless, prospective investors are advised to consider this data with caution. Prospective investors should note that some of the Issuer's estimates are based on such third-party information. Neither the Issuer nor the Issuing Houses have independently verified the figures, market data or other information on which third parties have based their studies.

Certain statistical information reported herein have been derived from official publications of, and information supplied by a number of government agencies and ministries, including the Central Bank of Nigeria ("CBN") and the National Bureau of Statistics ("NBS"). Official data published by the Nigerian government may be substantially less complete or researched than those of more developed countries. Nigeria has attempted to address some inadequacies in its national statistics through the adoption of the Statistics Act of 2007, which established the National Statistical System and created the NBS (which came into existence because of the merger of the Federal Office of Statistics and the National Data Bank) as its coordinator.

Forward-looking Statements

Certain statements in this Prospectus constitute "forward-looking statements". When used in this Prospectus, the words "project", "anticipate", "believe", "estimate", "expect" and similar expressions are generally intended to identify forward-looking statements. Such forward-looking statements, including the intended actions and performance objectives of the Offer, involve known and unknown risks, uncertainties, and other important factors that could cause the actual results, performance, or achievements of the Offer to differ materially from any future results, performance or achievements expressed or implied by such forward-looking statements. Investors should determine for themselves what reliance, if any, to place on such forward-looking statements.

In addition to other analytical tools, the Issuer may employ the use of financial models to evaluate investment opportunities. The accuracy and effectiveness of such models cannot be guaranteed. In all cases, projections are only estimates of future results which are based upon assumptions made at the time that the projections are developed. Projections are inherently uncertain and subject to factors beyond the control of the Issuer. The inaccuracy of certain assumptions, the failure to satisfy certain financial requirements, and the occurrence of unforeseen events could impair the ability of the Issuer to realize projected values and / or cash flow in respect of the Offer. Therefore, there can be no assurance that the projected results will be achieved, and actual results may vary significantly from the projections. General economic and industry-specific conditions, which are not predictable, can have also an adverse impact on the reliability of projections.

Rounding

Certain figures included in this Prospectus have been subject to rounding adjustments. Accordingly, figures shown for the same category presented in different tables may vary slightly and figures shown as totals in certain tables may not be an arithmetic aggregation of the figures which precede them.

6. NIGERIAN MACROECONOMIC AND BANKING INDUSTRY OVERVIEW

6.1 Macroeconomic Overview

Nigeria's GDP grew by 2.74% year-on-year (Y-O-Y) in 2023. The outlook for GDP is expected to be positive in the long term, particularly following the removal of the fuel subsidy (which cost approximately US\$14 billion from 2020 to 2022). With the removal of the subsidy, the Government is projected to achieve fiscal savings which are expected to reach over ₦11 trillion by the end of 2025¹.

The Nigerian economy has experienced two recessions in the last 10 years due to negative oil prices, relatively limited oil production, supply chain disruptions and the outbreak of COVID-19. GDP performance in recent years generally has been supported by growth in non-oil & gas sectors, with the biggest growth drivers being agriculture, telecommunications, manufacturing, and trade. Data from the NBS showed that Nigeria recorded real GDP growth rates of 2.79% in 2015, -1.58% in 2016, 0.82% in 2017, 1.91% in 2018, 2.27% in 2019, -1.92% in 2020, 3.40% in 2021, 3.10% in 2022, and 2.74% y-o-y in 2023.

According to the NBS April 2024 inflation report, the headline Consumer Price Index ("CPI") increased by 33.69% y-o-y, higher than the rate recorded in April 2023 (22.22%). The principal driver is the food sub-index which increased to 40.53% compared with 24.61% in April 2023 y-o-y. Core inflation, which excludes the price of volatile agriculture produces and energy, stood at 26.84% in April 2024, up by 6.87% from April 2023.

Price increases were also recorded in the price of gas, liquid fuel, solid fuel, passenger transport by road, passenger transport by air, fuel and lubricants for personal transport equipment, cleaning and repair. The uptick in food inflation is reflective of the impact of Government policies such as the removal of subsidies on petrol, weak and inadequate infrastructure, among others. As the Government continues to address these challenges, inflation is expected to moderate downwards in the next 12 – 18 months.

Given persistent inflationary pressures, the CBN has been aggressive in hiking rates. In 2024 there have been three consecutive rate hikes. The first hike occurred in February 2024, when the MPC raised the MPR by 400bps to 22.75%, followed by a 200bps rate hike as MPR was increased to 24.75% in March. In May 2024, the MPC increased the MPR a third time by 150bps to 26.25%.

In 2023, the Naira witnessed a significant devaluation in June following efforts at unification of the official and parallel market exchange rates by the new administration. The parallel rate depreciated by 39.4% in 2023, while the official rate showed a 49.2% depreciation in the same period with the premium fluctuating between 1% and 68%.

Although a convergence between both markets was achieved in June – July 2023, a reemergence of the spread was witnessed in August 2023 highlighting the complexities in the country's economic condition. FX shortages weigh on economic activity and deter foreign capital.

In October 2023, the CBN lifted the ban on 43 items which had hitherto been banned from access to FX in the official market and took steps to clear nearly US\$7 billion of unmet FX forwards in a bid to address the rapid devaluation of the Naira.

In 2024, attention has been centered on ensuring liquidity and maintaining currency stability in the FX market as a preventive measure against inflationary pressures.

Pressure on the currency is expected to ease partially towards the end of 2024, an optimism fueled by improved oil production and refining, improved current account balance, external borrowings, and the Government's goal of achieving over US\$10 billion aggregate FX inflow. Also, new Government reforms around the exchange market are expected to reduce the exposure of the Naira to speculations as we move into a more regulated exchange rate environment.

¹ World Bank's Nigeria Development Update as of December 2023

6.2 Recent Trends in the Nigerian Banking Industry

Announcement of New Minimum Capital Requirement

In a circular issued on March 28, 2024, the CBN announced a revision of the minimum capital requirements for all commercial banks, merchant banks, and non-interest banks in Nigeria.

The increase in the minimum capital of banks is part of the CBN's efforts to strengthen banks' capacity to navigate the prevailing macroeconomic challenges and headwinds occasioned by external and domestic shocks and continue to support the growth of the Nigerian economy.

The increase in the minimum capital was long overdue as the last review of banks' capital requirements by the CBN was almost two decades ago in 2005, which saw the minimum capital requirements for the banking industry increase from ₦5bn to ₦25bn.

The dollar equivalent of the previous minimum capital requirement is considerably lower now in today's terms owing to rampant inflation and currency devaluation. A summary of the revised minimum capital requirement is shown in the table below:

Type of Bank	Authorization	Minimum Capital
Commercial	International	₦500 billion
	National	₦200 billion
	Regional	₦50 billion
Merchant	National	₦50 billion
Non-interest	National	₦20 billion
	Regional	₦10 billion

The CBN also stated specifically the categorisation of capital which comprise only of share capital and share premium and gave all banks a deadline of March 31, 2026, to comply with the new capital requirements. The following options were presented by the CBN to banks for consideration towards achieving the new minimum capital requirement:

1. Capital raise via offer for subscription, private placement and/or rights issue;
2. Mergers and Acquisitions (M&As); and/or
3. Upgrade or downgrade of license category.

A review of the capital base of all licensed Nigerian banks puts the total capital shortfall at c. ₦4.3tn; ₦2.3tn to be raised by commercial banks with international licences, ₦1.8tn to be raised by commercial banks with national licences, ₦200.0bn to be raised by banks with merchant banking licences, ₦56.0bn to be raised by banks with regional banking licences, and ₦14.0bn to be raised by banks with national non-interest banking licences.

FX Reforms

The Nigerian Naira has lost almost 40% of its value year-to-date against the United States Dollars (USD) as of June 28, 2024, following a revision of the methodology used by the CBN to set the official exchange rate in January 2024. Moreover, the CBN has instituted several FX regulations, detailed below:

1. Banks' net open position limit of foreign exchange currency assets and liabilities must not exceed 20% short or 0% long of shareholders' funds²;
2. Banks must seek CBN's approval before exercising an early redemption clause on their Eurobonds³;
3. Banks must have an adequate stock of high-quality liquid assets to cover maturing foreign currency⁴;
4. Banks must borrow and lend in the same currency and the basis of the interest rate for borrowing should be the same as that for lending⁵;

² Harmonization of Reporting Requirements on Foreign Currency Exposures of Banks issued 31 January 2024.

³ Same as above.

⁴ Same as above.

⁵ Same as above.

NIGERIAN MACROECONOMIC AND BANKING INDUSTRY OVERVIEW

5. CBN eased rules on international money transfer operators (IMTOs);⁶; and
6. CBN prohibited the practice of obtaining Naira loans using foreign currency denominated collateral.⁷

The trend of significant currency devaluations has historically prompted banks to maintain long net open positions, which has culminated in them reporting record profits for the year ended 2023 from revaluation gains. Nevertheless, such abrupt shifts in the exchange rate can precipitate a severe erosion in the value of banks' FCY holdings, adversely impacting their capital and solvency levels, and consequently amplifying risk within the sector. By curbing banks' capacity to engage in speculative trading of the naira, the new regulations aim to mitigate their foreign exchange exposure and foster greater liquidity in the currency market. Ultimately, these measures are expected to bolster the stability of the currency itself.

6.3 Competitive Landscape of the Nigerian Banking Industry

The Nigerian banking industry is characterised by three main features: a high level of concentration, minimal foreign involvement, and a strong dependence on cash, despite the Government's and the CBN's effort to promote digital banking.

The top 10 banks in Nigeria possess just under 90% of the country's total banking assets, with the top three controlling around 60%. The CBN lists 25 licensed commercial banks. Foreign banks operating in Nigeria comprise only about 6% of total banking assets, which is among the lowest globally.

Commercial banks in Nigeria can be broadly segmented into 3 tiers.

- Tier 1 – First Bank of Nigeria, United Bank for Africa, Guaranty Trust Bank, Access Bank, and Zenith Bank
- Tier 2 – First City Monument Bank, Fidelity Bank, Stanbic IBTC Bank, Ecobank Nigeria, Wema Bank, Citibank Nigeria, Union Bank of Nigeria, Sterling Bank, Standard Chartered Bank Nigeria, Unity Bank, and Polaris Bank; and
- Tier 3 – Titan Trust Bank, Globus Bank, Keystone Bank, SunTrust Bank Nigeria, Paralex Bank, Providus Bank, Premium Trust Bank, Signature Bank, and Optimus Bank.

FCMB Limited is Nigeria's eighth largest bank by total assets at, ₦4.31tn as of December 31, 2023. FCMB Limited saw significant growth in its assets (48% y-o-y), deposits (54% y-o-y) and profit after tax (224% y-o-y) for the year ended 2023.

⁶ Reviewed Guidelines of International Money Transfer Services in Nigeria, issued 31 January 2024.

⁷ The Use of Foreign-Currency Denominated Collaterals for Naira Loans issued 8 April 2024.

6.4 Regulatory Environment

On 7 March 2023, the CBN approved operational guidelines on open banking in Nigeria. Nigeria is now the first African country to implement an open banking services framework. The regulation outlines how traditional banks and other financial services providers will access and manage customer data in the country.

In December 2023, the CBN lifted its ban on cryptocurrency trading, which was implemented back in February 2021 to reduce money laundering and terrorism financing risks. However, in January 2024, the CBN released guidelines for banks opening cryptocurrency accounts, while retaining its ban on banks' ability to trade or hold virtual assets.

While crypto providers can open bank accounts, these can only be in naira and cash withdrawals are not permitted. Nonetheless, in February 2024, FGN ordered telecoms firms and other internet service providers to block access to cryptocurrency trading platforms, including Binance, Coinbase and Kraken.

In January 2024, the Africa Stablecoin Consortium (ASC) reported that the CBN has approved their cNGN Naira stablecoin project, under the CBN's regulatory sandbox. The cNGN is intended to complement, and not substitute the eNaira. While the stablecoin complies with regulatory requirements set by the CBN, the ASC will oversee it, and it will be pegged 1:1 to the Naira and backed by Naira reserves held in certain commercial banks. The aim is to bridge the gap between the Naira and digital currencies, and help Nigerians abroad send money to their families in Nigeria without waiting for remittances, as well as eliminate expensive transfer fees.

LETTER FROM THE CHAIRMAN

5. Rationale for the Offer

In a circular dated Thursday March 28, 2024, the Central Bank of Nigeria announced an upward review in the minimum capital requirement for banks. This review impacts the Group's flagship banking subsidiary, FCMB Limited, being a Nigerian bank with an international license.

Consequently, FCMB Limited is required to embark on a capitalization exercise to increase its paid-up capital from ₦102 billion to a minimum of ₦500 billion in compliance with the CBN's new requirement.

FCMB Limited has shared its capitalization plan with the CBN, and this will be driven by FCMB Group given that the Bank is a wholly owned subsidiary of FCMB Group.

In light of this, FCMB Group is required to raise capital which will be further down streamed into the Bank towards achieving the minimum capital requirement for an international banking license.

6. Terms of the Offer

FCMB Group Plc is offering 15,197,289,219 new ordinary shares by way of an offer for subscription at ₦7.30k per ordinary share of ₦0.50k each.

The offer price represents a discount of approximately:

- 7.6% to the closing share price of ₦7.90k on June 06, 2024
- 4.2% to the 30-day VWAP of ₦7.62 on June 06, 2024

7. Use of Proceeds

The proceeds from the Offer will be used to recapitalize FCMB Limited in line with the Bank's new minimum capital requirement. Further details on the use of proceeds have been provided for your review on page 49 of this Prospectus.

8. Conclusion

On behalf of the Board of Directors, I invite prospective investors to participate in this Offer and support the Group in achieving its strategic growth objectives.

Amongst other information, this Prospectus contains the application procedure and list of Receiving Agents from pages 66 to 70 detailing full instructions for making payment and subscribing to the Offer.

16. RISK FACTORS

Investors should consult their advisers if in any doubt as to the nature of this investment and its suitability in the light of their particular circumstances. The value of any securities traded (whether listed or not) are subject to investment risks, can and do fluctuate, and any individual security may experience upward or downward movements. There is an inherent risk that losses may be incurred rather than a profit made as a result of buying and selling securities. Past performance is not a guide to future performance. Certain types of investments may not be suitable for all investors.

Economic Risk

The Group's operations are predominantly conducted in Nigeria, where most of its customers also reside. Accordingly, the Group's business, the result of operations, and/or financial condition, and the ability to recover on its loans and other assets, depend significantly on the economic and political conditions prevailing in Nigeria.

These are risks that impact macroeconomic variables such as GDP, exchange rate, interest rates, oil prices, inflation, and monetary and fiscal policies which will adversely affect the business and financial performance of the Group.

The Nigerian economy is largely dependent on crude oil production, which has, in the past, been affected by incessant security crisis and political disturbances in the Niger Delta region. Up until recently, activities in this region have been volatile affecting the entire spectrum of the oil and gas industry.

In addition, a number of manufacturing/trading companies have been impacted by the difficulty in accessing foreign exchange for the purchase of raw materials or finished goods, leading to a significant decline in output and an increase in prices. This has hindered the ability of such companies to service their loan facilities, thereby impacting the profitability of some banks and leading to higher impairments.

Also, given that receipts from the sale of oil form a major source of foreign exchange for the Federal Government, changes in oil production or global oil prices may cause a substantial drop in foreign currency reserves and the strength of the currency which could have significant effects on production and inflation..

Political Risk

These are risks related to political instability, security, religious differences and ethnicity in Nigeria. Over the past five years, there has been an increase in the number and frequency of attacks and cases of kidnapping across various parts of Nigeria.

In recent times, Nigeria has witnessed considerable unrest, terrorism and political and religious conflicts. Divisions based on geography can be magnified by religious differences, particularly between the north, which has a predominantly Muslim population, and the south, which has a predominantly Christian population. These regional affiliations have in the past contributed to, and may continue to contribute to, political and religious tension, which can also lead to societal unrest.

Sectarian conflicts in the Middle Belt and Northern region of the country also continue to pose a threat to Nigeria's political stability. The intermittent crisis and insurgence of bandits have been identified as major contributors to the region's security challenges, especially in the North-Eastern part of Nigeria. The Federal Government is working to curtail the operations of these insurgent group, but this risk persists. In recent times also, the country has witnessed political demonstrations and tensions including calls for restructuring; protests around protecting the principles of the rule of law, and constitutionalism, amongst others.

Until the Federal Government is able to address the root of the problems that contribute to this risk (such as poverty, low level of education, religious intolerance, weak enforcement of law and order and insecurity), insurgent groups are likely to continue to operate.

RISK FACTORS

Liquidity Risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting due obligations associated with financial liabilities that are settled by delivering cash or any other financial asset. Ultimate responsibility for liquidity risk management rests with the Board of Directors, which has established an appropriate liquidity risk management framework for the management of the Group's short, medium and long-term funding and liquidity management requirements.

Market Risk

This is the risk of losses in on- or off-balance sheet positions that arise from movement in market prices. Changes in equity prices, interest rates, credit spreads, foreign exchange rates, commodity prices, and other financial assets may impact the Group. The Group also faces this risk from the perspective of its subsidiaries, whereby a downturn in the capital markets or other such unfavourable market developments may affect the profitability of the brokerage and investment banking businesses. It is difficult to predict with accuracy changes in economic or market conditions and to anticipate the effects that such changes could have on the Group's financial performance.

Regulatory and Compliance Risk

The Issuer's subsidiaries are subject to the regulatory purview of regulators such as the CBN, FRCN, PENCOM and the SEC, whose sanctions could have a material adverse effect on the Group's businesses, results of operations, financial condition and or prospects.

The Issuer and the Bank are subject to the risk of being sanctioned by the CBN and the SEC for non-compliance with applicable regulations. Failure by the Group to monitor, report and act on suspected financial crime and money laundering activities could expose the Group to losses, penalties or reputational damage.

Foreign Exchange Risk

These are risks that arise from the change in the price of one currency against another. The Group undertakes financial transactions domiciled in foreign currencies. Unfavourable movement in exchange rates may affect these foreign currency transactions, affect the value of the subsidiaries' foreign currency-denominated assets and liabilities and have a negative impact on the financial condition of such subsidiaries and/or the Issuer.

Operational Risk

This is the risk of direct or indirect loss arising from inadequate and/or failed internal processes, people and systems or external events. They include fraud, fines or expenses incurred as a result of settlement delays and regulatory infractions; litigation processes including out of court settlements; damage to the physical assets of the Issuer and its subsidiaries; system downtime; malfunction or disruption and the losses arising thereof.

This also includes risks associated with both deliberate and deceitful actions such as fraud, unauthorized breaches of policy and procedure, collusion, or sabotage, as well as inadvertent occurrences stemming from errors or mistakes resulting from a lack of awareness of established policies and procedures, all of which have the potential to lead to financial losses for the Group.

Legal Risk

Legal risk encompasses the potential hazards stemming from the Group's contractual commitments, including the vulnerability to litigation that these contracts may entail. Failure to mitigate these risks could lead to the gradual erosion of the Group's value. Additionally, the Group faces exposure to various risks concerning its permits, licenses, and approvals necessary for its operations. Should any of its subsidiaries fail to renew, obtain, or adhere to these permissions, or if they face suspension, termination, or amended adverse conditions, it could disrupt the operations of that subsidiary and impact the Group's financial standing.

RISK FACTORS

Technology/Cyber Security Risk

Technology risk encompasses threats to the integrity of the Group's information systems and technology infrastructure, which could arise from unauthorized access, use, disclosure, modification, disruption, or destruction of information technology assets and systems.

Environmental Risk

The operations of the Group are exposed to certain environmental challenges, which include but are not limited to pollution, environmental degradation, global warming, severe flooding and other natural hazards. The nature of environmental risks is that they are often sudden, unpredictable and unforeseeable. There is no guarantee that such processes will prevent all accidents, which may impose a variety of liabilities and adversely affect the Group's business.

Investment Risk

The price of the Issuer's shares may be subject to market price volatility on the secondary market, as a result of sales or a real or perceived possibility of sales of a significant number of its shares in the secondary market which could adversely affect the prevailing market prices for the Issuer's shares. Also, the market price of the Issuer's shares may decline disproportionately in response to adverse economic developments, market forces, changes to the regulatory environment in which the Group operates or economic conditions that are unrelated to the Group's performance. Additionally, there may not always be available a liquid market for the secondary trade of the Issuer's shares due to the state of the Nigerian equity capital market, when compared to other markets. Thus, investors may not always find a ready buyer for their shares or may not be able to sell their shares at prices that will provide them with a return that is comparable to other developed secondary markets. Relatedly, by the provisions of CAMA, dividend on shares are only payable out of distributable profits. As a result, shareholders may not always receive dividend on their investment in the Issuer's shares due to certain factors such as the absence of distributable profits available to pay dividends or where dividend payments are restricted by the CBN due to the failure of any of the Issuer's subsidiaries to comply with capital adequacy requirements or meet any other requirements of applicable laws or regulations.

17. USE OF PROCEEDS

The CBN's March 24 Circular (the "Circular") stated that the only permissible form of capital would be share capital and share premium.

The Issuer's flagship subsidiary, FCMB Limited, has an international banking license and a total paid-up capital of ₦102.85 billion. In line with the Circular, the Bank requires the injection of additional capital up to ₦98 billion for a national banking license and ₦398 billion for an international banking license.

Consequently, the Issuer will invest the net proceeds of the Offer in FCMB Limited as a first step in ensuring that the Bank is able to achieve its plan in complying with the CBN's new minimum capital requirements.

19.2 The Group's Strategic Plan

The Group's vision is to be the premier financial services group of African origin. To achieve this, our future development plans encompass several strategic initiatives aimed at driving sustainable growth, scale and enhancement of our competitive position in the market. These initiatives include:

- a) **Consolidating our Ecosystem Strategy:** In line with our mission, to build a supportive ecosystem rooted in Africa, that connects people, capital and markets, we are integrating our diverse portfolio of products and services to create a synergistic environment that drives sustainable growth. By aligning our resources, technologies, and partnerships, we will continue to deliver solutions that meet the evolving needs of our customers. This strategic consolidation not only strengthens our market position but also fosters innovation, operational efficiency, and customer loyalty. As we continue to build and refine our ecosystem, we remain committed to providing exceptional value and driving long-term success for our stakeholders.
- b) **Digital Transformation:** By strategically leveraging our technology capabilities, we are transforming our operations, enhancing our competitive edge, and creating new opportunities for innovation and growth through:
 - **Proprietary core banking platform:** We have successfully developed and implemented our proprietary core banking system, with three members of the Group completing migration and the main bank commencing migration in 2024. This will accelerate our speed of innovation and reduce the cost of technology ownership.
 - **Digital transformation of existing businesses:** In addition to migrating to our proprietary core banking system, our consumer finance business is transforming into a FinTech entity. Loan origination, credit underwriting and disbursements are fully automated, while customer fulfilment/self-service will be fully automated by H1 2025.
 - **Build versus buy:** Our engineering organisation (over 50 engineers) has made us more innovative and agile in responding to customer and market needs. In addition to core banking, we now build and maintain all integration/API, backend layers and front-end interfaces, including web and mobile applications, for the United Kingdom and Nigerian markets.

STATUTORY AND GENERAL INFORMATION

- **New Businesses:** We have launched our borderless retail banking app proposition in the United Kingdom (comprising multicurrency, current accounts and fixed deposits, cards and cross-border payments). The platform facilitates diaspora flows to Nigeria and fully digitizes our United Kingdom franchise in preparation for scaling.
 - **New technologies:** Additionally, we are leveraging AI technology to enhance SME and consumer credit underwriting for our banking partners.
- c) **Expansion into New Markets:** We plan to explore opportunities for geographic expansion into new markets, leveraging our existing strengths and capabilities to capture untapped growth potential. We believe this is a pivotal step in our growth strategy, enabling us to diversify our revenue streams and increase our global footprint. By entering these emerging and established markets, we can tap into new customer bases, leverage local opportunities, and mitigate risks associated with our existing region. Our approach involves thorough market research, strategic partnerships, and tailored offerings that meet the specific needs of each new market. This expansion not only enhances our competitive edge but also drives innovation and provides us with invaluable insights that can be applied across our entire operation.
- d) **Sustainability and ESG Initiatives:** Our commitment to sustainability and ESG (Environmental, Social, and Governance) initiatives underscores our dedication to long-term value creation. Our future development plans include increased integration of environmental, social, and governance (ESG) considerations into our business practices and pursuing initiatives that promote sustainability and social impact. By integrating sustainable practices across our operations, we aim to minimize our environmental footprint, promote social well-being, and uphold the highest standards of corporate governance. By prioritizing sustainability and ESG, we not only fulfill our ethical responsibilities but also strengthen our resilience and competitive advantage, driving positive outcomes for all our stakeholders.
- e) **Organizational Culture:** Our people are our most valuable asset, and we remain committed to nurturing a culture of excellence, collaboration, and innovation. We will continue to invest in talent development programs and initiatives to attract, retain, and develop top talent, ensuring that we have the capabilities and expertise to execute our growth plans successfully. Our culture has also been reinforced by a clear sense of purpose: to foster inclusive and sustainable growth in the communities we serve; and proprietary technological capabilities unlocked by the 4th and 5th industrial revolutions that are coming in rapid succession.

We will continue to leverage our Group structure to build a technology-driven ecosystem that will foster inclusive and sustainable growth in the communities we serve.

19.3 ESG and Social Responsibility Contributions

Despite a turbulent year marked by global economic challenges, including high inflationary pressures, climate change, volatile FX, insecurity, and local market challenges, the Group remained guided by its purpose, core values, and commitment to drive transformative change for all stakeholders.

Our approach is “to foster inclusive and sustainable growth in the communities we serve.” This drives our commitment to improve access to financial services for the unbanked and underbanked through different layers of partnership engagements. We empower women and youths by unlocking their potential to create wealth. In our quest to make energy affordable and accessible, we secure access to affordable and reliable clean energy sources to illuminate homes and businesses in various communities nationwide. Furthermore, we are building resilience on Environmental, Social, and Governance (ESG) issues, which are of utmost importance to our institution, employees, partners, communities, and stakeholders.

We work alongside passionate stakeholders, such as partners and investors, who share our mission to drive positive change. The good news is that we are not alone, and there are abundant opportunities for growth, innovation, and impact within the markets we serve. Alongside those sharing the same goals, we will leverage partnerships to attain greater effectiveness and scale to deliver the desired impact. This partnership model enables us to significantly leverage our internal capabilities to deliver and enhance our financial and impact scorecards, which are consistently ranked among the best in the country. Our services are benchmarked against rigorous global standards within a highly regulated system like the United Nations (UN) Global Compact that champions positive change.

STATUTORY AND GENERAL INFORMATION

Some notable initiatives during the year ended 31 December 2023 were as follows:

- **Small and Medium Scale Enterprises (SMEs) Funding:** We provided over ₦13bn worth of microloans to 120,000 SMEs across Nigeria, of which over 80% were women-owned businesses, and disbursed over ₦430bn digital loans to over 67,000 SMEs.
- **Community Impact and Partnerships:** Through strategic partnerships, we reached 506,425 people - men, women, youths, persons with disabilities, and internally displaced persons in Nigeria. This activity has built partnerships with 80 private sector partners, out of which 31 of them have received catalytic grants to scale or expand their businesses in Northeast Nigeria, resulting in the creation of 14,453 jobs and facilitating US\$53,000,000 in sales and US\$15,000,000 in loans (access to credit) by participants. This has also mobilised US\$7,000,000 in leverage - monies contributed by private-sector partners to the activity's goals.
- **Localised Human Capacity Building:** We also helped smallholder farmers improve their technical, business management/financial literacy, and soft skills through technical and enterprise development training and information deployed by trained service providers. The farmers were supported to adopt the best agronomic practices and supported to cultivate over 4,300 hectares of land for farming (one hectare per farmer) in communities cutting across 23 local governments in Borno, Adamawa, Yobe, and Gombe. They engaged in the production of rice, maize, cowpea, groundnuts, sheep, and goats.
- **Responding to Climate Issues:** We responded to climate-pressing issues by providing loans worth ₦7 billion to firms in the renewable energy sector to enable them to deploy clean energy systems, such as solar home systems and mini-grids, to meet household and commercial demands in rural areas and cities. We financed mini-grid and hybrid energy-efficient projects for 3,949 homes and SMEs across the country, bringing the total electricity connection to 13,548.
- **Ensuring Equity:** Through SheVentures, our women in business proposition, we have offered up to One Billion Naira in zero-interest loans to hundreds of women SMEs nationwide and supported over 2,000 female entrepreneurs through free training, mentorship, and capacity-building programmes.

STATUTORY AND GENERAL INFORMATION

19.18 Claims and Litigation

The following is the opinion on claims and litigation involving the FCMB Limited, prepared by the Solicitors to the Issue, Banwo & Ighodalo in connection with the Offer:

"In connection with the Public Offer, FCMB Group Plc. confirmed by a letter dated June 7, 2024, that it is not involved in any: (i) legal action or claim either as claimant, defendant, appellant, respondent, or any other capacity (ii) on-ongoing third-party claim, administrative or regulatory proceedings, arbitration, or any other alternative dispute resolution proceedings; and (iii) on-going or anticipated arbitration or other alternative dispute resolution proceedings.

In view of the foregoing and given that First City Monument Bank Limited (the Bank) is the principal subsidiary of FCMB Group Plc., we reviewed the Bank's litigation portfolio.

First City Monument Bank Limited is, in its ordinary course of business, sued as Defendant in Three Hundred and Ninety-Two (392) cases.

In the context of the contemplated Transaction, we set a materiality threshold of N500,000,000.00 (Five Hundred Million Naira) (the "Materiality Threshold") with regard to the monetary reliefs claimed in cases against the Bank. We identified and reviewed Sixteen (16) case files maintained by the Bank (comprising copies of processes filed in court), within and above the Materiality Threshold. These cases represent over 80% of the value of all the claims against the Bank.

Following our review, we understand that One (1) case has been struck out for lack of diligent prosecution, thereby leaving a total of Fifteen (15) ongoing cases within the Materiality Threshold.

Of the said Fifteen (15) cases, the Bank is Appellant in Two (2) cases in which judgment had previously been delivered against its interest. The total judgment sum in the Two (2) cases in which judgment had been delivered against the Bank, is approximately N1,529,053,206.00 (One Billion, Five Hundred and Twenty-Nine Million, Fifty-Three Thousand, Two Hundred and Six Naira) excluding interests which may accumulate on the judgment sums until same is finally liquidated. We note that the Bank's above-referenced appeals are yet to be determined.

Following our due diligence review, the total value of claims against the Bank in the Fifteen (15) ongoing cases within and above the Materiality Threshold is approximately N36,014,477,994.86 (Thirty-Six Billion, Fourteen Million, Four Hundred and Seventy-Seven Thousand, Nine Hundred and Ninety-Four Naira, Eighty-Six Kobo) excluding interests and costs, which may be awarded by the courts after the final resolution of each matter.

We are of the opinion that majority of the cases instituted against the Bank are exaggerated, frivolous and speculative. Most of these cases involve claims by loan defaulters who instituted the suits as pre-emptive actions to delay the Bank's recovery efforts in respect of outstanding facilities.

Based on our assessment of the information contained in the case files provided for our review, our experience in litigation matters and our understanding of the disposition of Nigerian courts in the award of damages and other claims, we believe that the liability that would arise from the cases against the Bank, where same are diligently defended, would not have a material adverse effect on the proposed transaction.

We also identified and reviewed counterclaims filed by the Bank in Eleven (11) cases within and above the Materiality Threshold. Following our due diligence review, the total value of the Bank's counterclaims is approximately N4,132,257,531.75 (Four Billion, One Hundred and Thirty-Two Million, Two Hundred and Fifty-Seven Thousand, Five Hundred and Thirty-One Naira, Seventy-Five Kobo) excluding interests and costs, which may be awarded by the courts after the final resolution of each counterclaim.

We note that the majority of the counterclaims by the Bank involve claims against loan defaulters to recover outstanding facilities and we are of the opinion the Bank's counterclaims have a good chance of success if diligently prosecuted.

STATUTORY AND GENERAL INFORMATION

Our opinion herein is based solely on our review of case files in respect of the cases instituted against the Bank which are within and above the Materiality Threshold and the Bank's counterclaims in the above-referenced cases. Please note that we did not conduct independent reviews of records maintained at the various courts hearing these cases. Also, we have not held discussions with any of the external counsel handling these cases on behalf of the Bank.

Therefore, the Solicitors to the Transaction are of the view that the contingent liability that may arise from the cases involving the Bank where same are competently and diligently defended, is not likely to have a material adverse effect on the Bank or the Transaction.

Save for the foregoing, the Solicitors to the Transaction are not aware of any claim or litigation pending or threatened against the Bank which (i) materially or adversely affects the Bank's ability to fulfill its obligations under the Transaction; and/or; (ii) affects the validity of the proposed Transaction or restricts the proceedings or actions of the Bank with respect to the Transaction."
